Smart Vending Management

With our ERP system, costs, time, and effort by managing your business at the click of your fingertips

Monitor and Control Machines Remotely

- Decrease vending machine down-time
- Remote temperature fluctuation

Real-Time Inventory Management

- Live detailed inventory of each machine
- Popularity and sales status of each product
- Daily transactions & sales

Track & Manage Staff Refilling Activity

- Refill planning and dynamic routing
- Eliminates unnecessary visits & hence reduce operational costs

Wendor Dashboard

Plan Your

- Visit only the machines that require refilling
- Collect inventory accordingly
- Get rid of needless stops

Daily & Weekly

- Reports on sale data and analysis
- Know your weekly sales
- Know your most popular machine

Receive Alerts

- When machine is empty
- If machine is down
- In case of fluctuations

Inventory Control

- Track refilling activities
- Check refill history
- Know exact inventory

Refiller Oversight

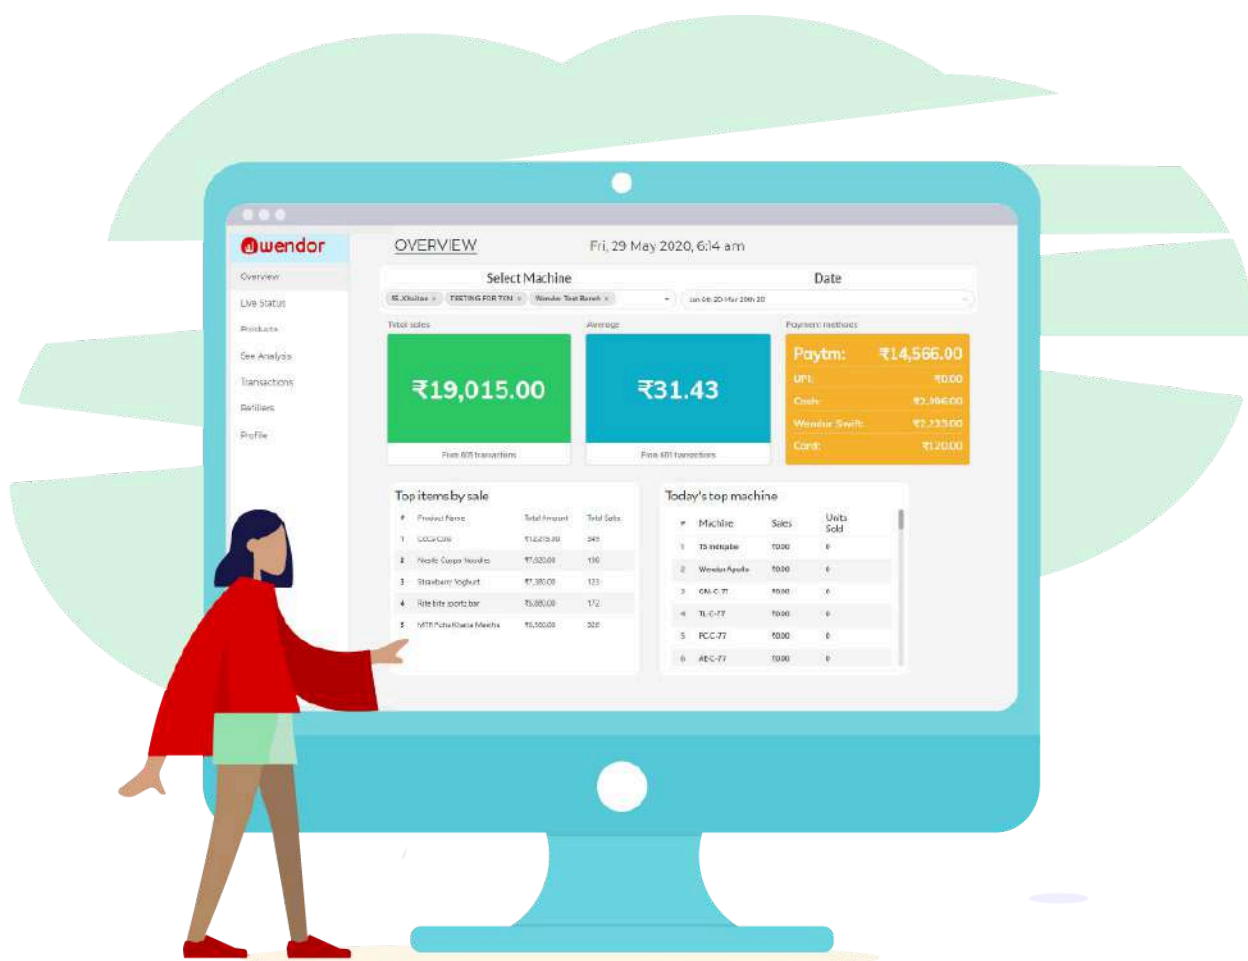

- Know refiller's live location
- Monitor refiller attendance
- Refiller visit timing and frequency

Sales & Demand

- Know most selling products
- Know popular time of the day/week
- Helps in refiling accordingly

Reduce Theft

- Know exact sales and cash brought in
- Know when refilling was done
- Do not rely on words only

Manage your entire business remotely and take informed business decisions.
